=== Final LLM Report ===

Patient Readmission Risk Report

Patient ID: PT011013

Report Date: September 05, 2025

Predicted Risk: High (99.0%)

Main Risk Factors

- - Normal blood pressure lowers your risk.
- - No diabetes lowers your risk.
- - Your young age (29) lowers your risk.
- - Low poverty rate in your area lowers your risk.
- - High family income lowers your risk.
- - Stable employment in your area lowers your risk.

Local Resources

- - Smith County Memorial Hospital (hospital)
- - Cedars of Lebanon (social_facility)

Recommended Interventions

- - Nutrition: Not Needed — A healthy diet can help manage cholesterol and overall health.
- - Smoking: Not Needed — Addressed based on your smoking status.
- - Exercise: Not Needed — Physical activity supports blood pressure and cholesterol management.
- - Financial Aid: Not Needed — Financial and social support can reduce stress and improve access to care.
- - Mental Health: Not Needed — Support if mental health conditions are present.
- - Community Support: Not Needed — Local organizations can help address social risk factors.
- - Environmental: Not Needed — Addressing environmental stressors supports your overall well-being.

Next Steps and Advice

- - Talk to your doctor about a plan to manage your health.
- - Ask about creating a diet and exercise plan that is right for you.

- - Look into the local community and social resources listed above.
- - Check your eligibility for financial assistance or food support programs.
